National Wildlife Federation Recognizes Local Business as “Certified Wildlife Habitat”

Franklin, Tennessee - The **National Wildlife Federation** (NWF) announces that the property of Tranquil Waterscape Designs, LLC, located in Franklin, Tennessee has been certified as an official Wildlife Habitat Site. Habitat restoration is critical in urban and suburban settings where commercial and residential development encroaches on natural wildlife areas.

The mission of the National Wildlife Federation is to inspire Americans to protect wildlife for our children’s future. David Mizejewski, NWF naturalist and host of Animal Planet’s “Backyard Habitat,” says, “It’s easy to feel there is no hope for wildlife in our modern world of smog, traffic, and asphalt. But there is hope. Each of us can make our own piece of the Earth a healthy, green space that helps restore the ecological balance.”

“We are very pleased to receive this honor from the National Wildlife Federation,” stated Randy Young, President of Tranquil Waterscape Designs, LLC. “Our natural water features provide an important part of the ecological equation; we take great pride in providing our naturally balanced and chemical free water sources for all of our customers.”

The National Wildlife Federation also has the School Yard Habitat Program. Tranquil Waterscape Designs, LLC, works in harmony with the North American Water Garden Society in support of their “Ponds for Kids” program that helps schools to obtain this designation. The “Ponds for Kids” program works on providing local schools professionally installed water features that can be used for educational purposes.

Tranquil Waterscape Designs began installing low maintenance, natural water features in 2001. Randy became the first and only Certified Aquascape Contractor in the Middle Tennessee area in 2002. The company recently re-located its retail business to 1219 Lakeview Drive in Franklin, Tennessee.
